About Us

Sedation Solutions LLP is a leading provider of sedation for the dental and medical community in the United Kingdom. We pride ourselves on our professional service and the reputation that we have established.

We presently serve approximately 500 practitioners and clinics, mainly in London and in the South East. Come and talk to one of our partners about how we can assist you in the provision of sedation for your patients.

CLINICAL SEDATION SERVICES

Sedation Solutions specialises in the provision of conscious sedation for dental and medical procedures.

Our team of highly qualified and fully trained sedation practitioners provides the highest standard of conscious sedation for the safe and effective management of anxiety and pain for patients who are phobic, fearful, undergoing extended or unpleasant procedures, or have other challenges such as a pronounced gag reflex.

SEDATION TECHNOLOGY & RESEARCH

Sedation Solutions has developed sophisticated easy-to-use sedation software that captures all clinical, monitoring and pharmacologic data from the beginning of each sedation session and throughout the procedure until discharge of the patient.

This provides a comprehensive and secure electronic clinical record, as well as a rich database of information that can be used for research, auditing, and compliance purposes.

SEDATION PRACTICE DEVELOPMENT

Sedation Solutions assists surgeries and clinics to provide sedation services in a professional and compliant manner. We ensure that they can maximise the benefits and opportunities of providing sedation for patients.

Our services include:

- 1) practice appraisal & compliance services
- 2) training & mentoring programmes
- 3) software & documentation kit
